RECORDS MANAGEMENT, Tenth Edition, provides a comprehensive introduction to the complex field of records management. The text features sound principles of records and information management that include the entire range of records--physical (paper), image records, and electronic media used in computerized systems. Part I, Records and Information Management, provides thorough coverage of alphabetic filing rules, as well as methods of storing and retrieving alphabetic, subject, numeric, and geographic records. The rules agree with the latest standard filing guidelines presented by ARMA International. Part II, Electronic Records Management, introduces electronic records file management as well as classifying electronic files using metadata, taxonomies, and file plans; and the use of magnetic, optical and solid state media through the phases of the records management life cycle.A new chapter introduces Enterprise Content Management (ECM) and describes how Microsoft SharePoint is used in Records Management. Part III, RIM Program Administration, delves into the records and information management (RIM) program components and guidelines; with expanded coverage of information governance, social media, and the records and information manager's responsibilities. In addition to content based on ARMA International standards and best practices, the text features realistic database activities, profiles of real-world professionals, and practical advice and examples to prepare students for career success. The Tenth Edition features extensive updates, including a restructuring of the chapters to reflect the growing importance of electronic records management.

Judith Read, M. Ed., is a professional educator who taught high school for nine years and has taught for more than 28 years at Portland Community College (PCC). She was named Post-Secondary Teacher of the Year by the Oregon Business Education Association and by the Oregon Vocational Association. She is now an adjunct instructor teaching distance classes for PCC, as well as an active member of ARMA International and the Oregon Chapter of ARMA. Read holds ARMA International certificates in Essentials of RIM and SharePoint Records Management.

Mary Lea Ginn, Ph.D., is Director of International Student Services and the Institutional Review Board at Union Institute & University in Cincinnati, Ohio. Her professional experience includes positions as a university instructor, textbook development editor, and consulting editor in business and records management areas. Dr. Ginn has authored and co-authored four college-level textbooks."I've used this book for nearly 30 years for my classes in Records Management and it is still the best book for this class. It is easy to understand and the examples make it easy to understand the filing rules."

"Love the new updated information. This information changes so quickly with the changes we have in technology that we have to stay on top of it."
Other Books
Enterprise Content Management, Records Management and Information Culture Amidst E-Government Development, This book identifies key factors necessary for a well-functioning information infrastructure and explores how information culture impacts the management of public information, stressing the need for a proactive and holistic information management approach amidst e-Government development. In an effort to deal with an organization's scattered information resources, Enterprise Content Management, Records Management and Information Culture Amidst E-Government Development investigates the

key differences between Enterprise Content Management (ECM) and Records Management (RM), the impact of e-Government development on information management and the role of information in enhancing accountability and transparency of government institutions. The book hence identifies factors that contribute to a well-functioning information infrastructure and further explores how information culture impacts the management of public information. It highlights the Records Continuum Model (RCM) thinking as a more progressive way of managing digital information in an era of pluralization of government information. It also emphasizes the need for information/records management skills amidst e-Government development. Ideas about records, information, and content management have fundamentally changed and developed because of increasing digitalization. Though not fully harmonized, these new ideas commonly stress and underpin the need for a proactive and holistic information management approach. The proactive approach entails planning for the management of the entire information continuum before the information is created. For private enterprises and government institutions endeavoring to meet new information demands from customers, citizens and the society at large, such an approach is a prerequisite for accomplishing their missions. It could be argued that information is and has always been essential to all human activities and we are witnessing a transformation of the information landscape. Presents research with broad application based on archives and information science, but relevant for information systems, records management, information culture, and e-government Examines the differences between Enterprise Content Management and Records Management Bridges a gap between the proponents of Enterprise Content Management and information professionals, such as records managers and archivists
