"The Well-Connected Dog: A Guide to Canine Acupressure" is an easy to follow manual with lots of illustrations, photographs and charts. Acupressure connects you with 1000's of years of natural healing and has proven to enhance performance, health and overall well-being. This book gives you the tools to participate in your dog's optimal health.

Over the past 15 years Nancy Zidonis has co-authored acupressure texts and developed equine, canine and feline meridian charts as well as acupressure training programs. She teaches acupressure throughout the US and Europe and is a founding board member of The International Alliance of Animal Therapy and Healing (IAATH).

Amy Snow has combined her professional publications background and experience in the healing arts with her love of all animals in co-authoring this book. When growing up in New York City she longed for a time and place to devote her life to the care and welfare of gentle animals. Teaching acupressure allows her the opportunity to offer people and animals a meaningful way to care for each other. The authors of this book have done something truly remarkable. They have created a book, as well as a tool, that encourages and teaches a hands-on approach to health. This manual empowers people, giving them the ability to participate in the health and well-being of their dogs. -- Shelly Hawley-Yin, Director, Animal Alliance of Canada

This book does for canine acupressure what my books do for human acupressure, presenting the traditional theory in an easily digestible way and making it very do-able. Just by reading this book and trying the stretches and the point recipes for common problems, you can help your dog's health. -- Iona Marsaa Teegarden, MA, Author

This book is a contribution to the necessary turn-around in our thinking about life and reactions toward disease and suffering. It is indeed a welcome and much needed addition to the growing library of useful texts and manuals on companion animal care and health maintenance. Additionally, there is benefit for those who discover the power of the healing touch. It is something that we can all give, and refine and in the process we facilitate our own healing and wholeness as we relax, focus and touch --Dr. Michael W. Fox, Author and Veterinarian
