Corresponding to the chapters in Kee's Pharmacology: A Patient-Centered Nursing Process Approach, 8th Edition, this study guide offers practical activities to help you review and remember essential nursing pharmacology. Hands-on exercises include study questions, case studies, and NCLEX® review questions, making it easier to apply your knowledge to clinical practice and develop clinical reasoning skills.

- >> NCLEX® review questions in each chapter include application-level questions and alternate-item format questions.
- >> Case studies enhance your understanding of nursing responsibilities in therapeutic pharmacology.
- >> Medications and Calculations chapter offers additional opportunities to test your knowledge and skill in drug dosage calculation.
- >> 75 sample drug labels familiarize you with the real labels you will see in clinical practice.
- >> Answers for all exercises are provided at the back of the book to make studying easier.
- >> Study questions are provided in formats including matching, completion, and crossword puzzles.
- >> NEW! Updated content reflects the changes to Kee's Pharmacology textbook.
- >> NEW! Case study questions focus on developing your clinical reasoning skills.
- >> NEW! Rationales are added to the answer key for selected application-level questions and case study questions.
- >> NEW safety icons emphasize the nurse's role in patient safety.
- >> NEW! Case studies now feature open-ended questions to promote development of clinical reasoning skills.

Other Books

Focus on Nursing Pharmacology. "Amy Karch has found that students learn best when concepts are built upon each other, growing from simple to complex, building on a foundation of understanding. Organized by body systems, this heavily illustrated book organizes essential nursing pharmacology information into focused, easy-to-learn steps. Building key concepts upon each other, the text gives students a solid foundation of understanding. Easy to understand drug prototype boxes are integrated throughout the book as well as integrated content summaries. Contains more images depicting drug actions than any of the book's competitors. Includes the popular and proven "Focus on" theme for drug use across the lifespan, cultural and gender considerations, evidence-based practice, patient teaching, herbal and alternative therapies and dosage calculation; including "Focus on Safe Medication Administration;" and a "Drugs in Focus" table for each classification of drugs. Focused content and focused features equal a focused student. Drug discussions include therapeutic actions and indications, pharmacokinetics, contraindications and cautions and adverse effects. Detailed rationales are presented throughout. Each chapter opens with Learning Objectives and a Glossary of Key Terms, and ends with NCLEX-style questions, and contains a case study-based critical thinking exercise that sets up a situation, shows critical thinking, and then presents a discussion and case-based nursing care guide. Features like this make the book an essential teaching tool!"--Publisher's Website.
