Inspired by a stuffed toy, Jane Goodall became the first woman to study chimps in the wild and in the process made history.

As a child, Jane Goodall was given a stuffed chimpanzee named Jubilee, and she has said her fondness for this figure started her early love of animals. While others thought Jane would be terrified by the toy, she adored it and it inspired a life-long love of animals in her.

Jane dreamed of a life spent working with animals, and when she was twenty-six years old, she ventured into the forests of Africa to observe chimpanzees in the wild. During her expeditions she braved many dangers and she got to know an amazing group of wild chimpanzees--intelligent animals whose lives, in work and play and family relationships, bear a surprising resemblance to our own. Through her work at Gombe Stream National Park in Tanzania and her own Roots and Shoots program she has become a tireless advocate for animals and the planet.

As for that stuffed toy, Jubilee still sits on Goodall's dresser in London. From the time she was a girl, Jane Goodall dreamed of a life spent working with animals. Finally she had her wish. When she was twenty-six years old, she ventured into the forests of Africa to observe chimpanzees in the wild. On her expeditions she braved the dangers with leopards and lions in the African bush. And she got to know an amazing group of wild chimpanzees -- intelligent animals whose lives, in work and play and family relationships, bear a surprising resemblance to our own. A DREAM COME TRUE

From the time she was a girl, Jane Goodall dreamed of a life spent working with animals. Finally she had her wish. When she was twenty-six years old, she ventured into the forests of Africa to observe chimpanzees in the wild. On her expeditions she braved the dangers of the jungle and survived encounters with leopards and lions in the African bush. And she got to know an amazing group of wild chimpanzees -- intelligent animals whose lives, in work and play and family relationships, bear a surprising resemblance to our own.

Jane Goodall's adventures with the chimps and the important discoveries she has made about them have gained her worldwide recognition. Now she tells her exciting story in her own words.

Other Books

Jane Goodall, *Up Close: Jane Goodall* by Sudipta Bardhan-Quallen *Up Close: Thurgood Marshall* by Chris Crowe A trailblazing scientist made famous by her favorite primates. Jane Goodall will forever be linked with the chimpanzees that she's studied for over fifty years. A pioneer in scientific research, she revolutionized longstanding views about chimps, forest conservation, and women in scientific fields. This *Up Close* biography tells the story of how a demure young woman from London went to Africa and changed the world. ? ? ? ? ? . "It was a . . .": van Lawick- Goodall . In the Shadow of Man , 18.
