What a stunning discovery: an old, coded note that actually contains directions for reaching the Earth's very core! And once he finds it, renowned geologist Professor Liedenbrock can't resist setting out with his 16-year-old nephew to go where only one man has gone before. Jules Verne takes young readers on one of the most incredible journeys ever imagined, from Iceland's frozen tundra far down into fantastic underground prehistoric worlds and back up again through the fires of an erupting volcano.

In this fully dramatized adaptation of Jules Verne's classic, *Journey to the Center of the Earth*, Leonard Nimoy, John de Lancie, and cast members from *Star Trek* feature films and all four TV series take you on an incredible journey.

Journey to the Center of the Earth is the story of Professor Lindenbrock, his nephew Axel and their quest for the secrets contained at the earth's core. Led by Hans, their Icelandic guide, Lindenbrock and Axel descend deeper into the planet than anyone has ever gone before...but will they make it back to the surface alive?

Featuring virtuoso performances from the entire cast, riveting sound effects and original music, Alien Voices' production of *Journey to the Center of the Earth* is an adventure in sound.

The Bookcassette format is a special recording technique developed as a means of condensing the full, unabridged audio text of a book to record it on fewer tapes. In order to listen to these tapes, you will need a cassette player with balance control to adjust left/right speaker output. Special adaptors to allow these tapes to be played on any cassette player are available through the publisher or some US retail electronics stores.
