---

Long acclaimed as the definitive introductory botany text for majors, *Biology of Plants* is especially known for its comprehensive coverage and its magnificent art program. The new edition offers a wealth of new information, especially in the areas of taxonomy, genomics, plant hormones, and *Arabidopsis* research.

PETER H. RAVEN is Director of the Missouri Botanical Garden, USA and one of the world's leading botanists and advocates of conservation. He received his PHD from University of California, Los Angeles after graduating from the University of California Berkeley, USA. In December 2001, the President of the USA awarded him the National Medal of Science, the highest award for scientific accomplishment in the country. RAY F. EVERT is Katherine Esau Professor of Botany and Plant Pathology at the University of Wisconsin. His research interests include studies on the development and structure of

#### Other Books

*Evolution and the Emergent Self*. This book examines how humans evolved from the cosmos and prebiotic earth and what types of biological, chemical, and physical sciences drove this complex process. The author presents his view of nature which attributes the rising complexity of life to the continual increasing of information content, first in genes and then in brains.
